INFORMATION BULLETIN		
	ATT # 6	
`	711'6	25
COUNTRY: Soviet Union		
SUBJECT: I. Port NOVOROSSISK (sighted battleships)		
II. FROGMEN EXCERCISES		
		25
I. SIGHTED BATTLESHIPS		
The following battleships were sighted early in October	er:	
In the harbor:		
a) A Soviet destroyer, about 60 meters long	The above battle-	25
ship had one funnel and one mast behind the bridge	and bore one gun on each	
end (bow and stern) and a torpedo tube sternwards of	of the funnel	
b) Three small iron battleships		25
These were about 30 meters long. Each had a funnel	and a mast in front of	
the bridge and bore a gun. These bore no Radar		
Outside the harbor		
Another destroyer of the same type	This was anchored	25
near the place where frogmen excercises take, place.	This was antifology	
	- C4 - 1)	25
	eft the harbor on the	
evening of 30 Sept. 1956		
I. FROGMEN EXCERCISES		
In the harbor and the left as one sails in, there is a	hear manked by huare	
in the harbor and the left as one sails in, there is a	page marked by onows.	

ATT	7

These excercises often expand outside of the harbor, to the right as one sails in, in the area where foreign ships anchor waiting for their turn to sail into the harbor.

Frogmen in training, were sighted on 1 Oct. 1956.

Buoys with small poles, as well as the three afore-mentioned small iron battle-ships, were anchored in the area where these excercises take place (in the harbor and to the left as one sails in).-

2.	De-gaussing Facility: A de-gaussing station is located at 440421450 No. Latitude, 370471300 E. Longitude in Novorossisk Bay. Two buoys are moored a ships length apart forming a line parallel to the shore and five to six cable lengths from it. Another line of three buoys is moored parallel to but to seaward of the first line. These buoys are spaced at the same intervals as the two which are moored closer to shore. Approximately a ships length separates these two lines. A small building with a landing pier equipped with davits is located ashore at this point.	2574
3.	Soviet Naval Vessels: At 1800 on 28 September, a minesweeper	25 X 1
	was being maneuvered ahead and astern in the area enclosed by the buoys described above.	· 25X1
	A minesweeper of the same class as 438, was moored 450 meters southwest of the Coaling Pier. Two white cables trailed from the stern of this vessel. Three wooden floats, upon which were mounted short metal "spars", floated near by. Two of these floats supported the ends of the two cables trailing from the stern.	
	A destroyer was moored between Eastern Mole and the Cement Works Pier.	
4.	Repair Facilities: A floating drydock, with a cargo vessel aboard, was moored inside Eastern Mole.	
5•	Port Construction: A floating crane and a large number of workers were employed in repairing or removing the damaged wharf in the vicinity of the "small craft repair slip" on the west side of the harbor. The floating crane moved a large stone block from the damaged wharf to the Eastern Mole.

1. Soviet Naval Vessers: A cruiser and four destroyers were moored at anchor approximately four miles off West Breakwater on 19 August. The cruiser had two funnels and two masts. They had sailed by 22 August. A destroyer and 4-5 coast guard boats were moored in the Timber Basin. 2. Surface Gunnery Targets: A target sled without target was being towed by two tugs on 19 August four to five miles off Cape Doob (44038'N., 37055'E). The tugs were on a course toward Novorossisk. Another target sled was moored at the Timber Wharf in Novorossisk. This sled carried a radar target and five shell holes were observed in the target cloth. 3. Illuminating Flares: Parachute flares were observed over the Timber and Naval Basin on the night of 19-20 August.		Sanitized Copy Approved for Release 2010/03/01: CIA-RDP80T00246A032900320001-1	Ζ;

•	Soviet Naval Vessels: A cruiser under repair or overhaul was berthed alongside Eastern Quay. From 13-22 October two cruisers, were moored at anchor outside the harbor in the vicinity of the power station.	25
	Four destroyers were in harbor at various times	25
	Each had a single stack and mast in addition to a short mast aft.	
	A submarine accompanied by two destroyers arrived on 13 October and sailed on 15 October. The conning tower of the submarine was light grey and the hull dark grey. The forward edge of the conning tower was straight and the "after side was curved".	
	Five minesweepers arrived and departed from the harbor during this period.	2
	These vessels each had a single stack and mast.	
	These vessels each had a single stack and mast. A large number of small high speed coast guard vessels were moored in the Timber and Naval Basin. One of these vessels flew the MVD Border Patrol flag.	
	A large number of small high speed coast guard vessels were moored in the Timber and Naval Basin. One of these vessels

storey ones, covered with tile
There are fuel tanks in the harbor, shown on the drawing. 6-7 of them,
painted dark lead, are visible. Ships can bunker at the rate of 150 tons per
hour
An 18.000-ton tanker can dock on either side of the mole extending from
the position of the fuel tanks. That is, two ships can moor at the same time.
two 13.000-ton tankers loaded up within 12 hours' time 25X
There is a silo along the mole for loading cereals. This is an old one, and
for the present it uses only 3 tubes. A 6.300-ton vessel loaded in 30 hours,
using all three tubes(pipes)
The railroad tracks of the harbor, are those shown on the Clawing. Same
are laid above ground level, not on the ground.
The harbor is being used as a Naval Pase
The lighting of the harbor is good
EQUIPMINT:
The harbor is equipped with land cranes. Loading and unloading is being
cone by the derricks of the ships. There were no floating cranes seen
The moles are equipped with hydrants, the spouts of which are $2-2\frac{1}{2}$ inches
in diameter. water supply is 25X
carried out at a very slow pace, viz: at the rate of la tons per hour
There are no shipyards in the harbor
25X1
FEARS OF MAVIGATION OF THE HAREOR: are
There are no lighters. There/4-5 large, DESML-engined tug-boats.
There is a small number of row-boats in the harder

	LOUGSHORELIN:	
	the number of the longshoremen working, is subject	ზა
cl	nge according to the needs of each port. There are no	
	women working in the harbor	
	TRAFFIC:	,
	2 ships sailed into the harbor daily	
	The harbor shows only exporting being done. The goods eported are small	1

th si	ntities of timber, wheat, ciment, ore, helianthus (sunflower) seed oil products.— PATIBISHES: 3 medium size destroyers were there noored by the stern at point (c) or drawing. Same had one funnel painted grey and the Russian flag (a hammakle and a star on white cloth). Same bore a gun on each end — stern and	a or an orow

The following vessels were anchored in the area outside of the harbor:

Point ϕ 44° 42' N. λ 37° 48' E. marks position of a cruiser with two masts and two funnels. This is about 470 ft. long and is equipped with a radar and twin guns placed on two superimposing turrets on stern and bows.

Point ϕ 44° 41' 30'' N. λ 37° 51' 30'' E. marks position of a cruiser with two masts and two funnels. This is also about 470 ft. long and is equipped with a radar and twin guns placed on two superimposing turrets on stern and bows. This soemed like an old-type battleship.
